Subbing For Player # _____

Sub #2

Subbing For Player # _____

City Team Players: All regular team members must have 60% of the games played for the division played. If your team doesn't have all regular players with 60% of the games you do not have a team for city. You can not replace a player who has less than the required percentage of games with a sub, as they are not a regular player. This applies to all league formats.

Subs for City: A team sub must have subbed for the player or player's they are replacing for no less than a total of six weeks during the season. Sub will be allowed to replace the regular player subbed for or if said sub was able to legally sub for all players on the team, sub can now replace any of the team players at city. A non team sub is any player listed in the end of season stat book with a MPR/PPD equal to or less than the player they are replacing.

For City Play-offs: Subs must be approved by the office 592-1555.

Teams will pre-register for City Tournaments using the form available at the NEDA office or website.
